## Forward-Looking Statements

In this presentation, statements that are not reported financial results or other historic information are "forward-looking statements." These forward-looking statements relate to, among other things, the Company's future financial position, business strategy, targets, projected sales, costs, earnings, capital expenditures, debt levels and cash flows, and plans and objectives of management for future operations.

The use of words such as "may," "will," "expect," "intend," "estimate," "anticipate," "believe," "should," "project" or "plan" or similar terminology are generally intended to identify forward-looking statements. These forward-looking statements by their nature address matters that are, to different degrees, uncertain and are subject to risks, assumptions, and other factors, some of which are beyond Brady's control, that could cause actual results to differ materially from those expressed or implied by such forward-looking statements. For Brady, uncertainties arise from: our ability to compete effectively or to successfully execute our strategy; Brady's ability to develop technologically advanced products that meet customer demands; difficulties in protecting our websites, networks, and systems against security breaches; decreased demand for our products; Brady's ability to retain large customers; extensive regulations by U.S. and nonU.S. governmental and self-regulatory entities; risks associated with the loss of key employees; divestitures and contingent liabilities from divestitures; Brady's ability to properly identify, integrate, and grow acquired companies; litigation, including product liability claims; Brady's ability to execute facility consolidations and maintain acceptable operational service metrics; foreign currency fluctuations; the impact of the Tax Reform Act and any other changes in tax legislation and tax rates; potential write-offs of Brady's substantial intangible assets; differing interests of voting and nonvoting shareholders; Brady's ability to meet certain financial covenants required by our debt agreements; numerous other matters of national, regional and global scale, including those of a political, economic, business, competitive, and regulatory nature contained from time to time in Brady's U.S. Securities and Exchange Commission filings, including, but not limited to, those factors listed in the "Risk Factors" section within Item 1A of Part I of Brady's Form 10-K for the year ended July 31, 2018.

These uncertainties may cause Brady's actual future results to be materially different than those expressed in its forward-looking statements. Brady does not undertake to update its forward-looking statements except as required by law.
